Let $np_{-1} : \iota$ be given. Let $k1_rcomp_1 : \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k6_numbers : \iota$ be given. Assume the following.

$$(k6_numbers \in k1_rcomp_1 \ k6_numbers \ np_{-1}) \wedge (np_{-1} \in k1_rcomp_1 \ k6_numbers \ np_{-1}) \quad (1)$$

Theorem 1 $np_{-1} \in k1_rcomp_1 \ k6_numbers \ np_{-1}$.
