October 27, 2020

Let $k1_numbers : \iota$ be given. Let $k2_numbers : \iota$ be given. Let $r2_xboole_0 : \iota \Rightarrow \iota \Rightarrow o$ be given. Assume the following.

$$r2_xboole_0 \ k1_numbers \ k2_numbers \tag{1}$$

Assume the following.

$$\forall X0. \forall X1. (r2_xboole_0 \ X0 \ X1) \Rightarrow (\neg r2_xboole_0 \ X1 \ X0) \tag{2}$$

Theorem 1 $k1_numbers \neq k2_numbers$.
