Let $l1_abc Miz_0 : \iota \Rightarrow o$ be given. Let $u1_abc Miz_0 : \iota \Rightarrow \iota$ be given. Let $v4_abc Miz_0 : \iota \Rightarrow o$ be given. Let $v1_xboole_0 : \iota \Rightarrow o$ be given. Assume the following.

$$\forall X0.(l1_abc Miz_0 X0) \Rightarrow ((v4_abc Miz_0 X0) \Leftrightarrow (v1_xboole_0 (u1_abc Miz_0 X0))) \quad (1)$$

Theorem 1

$$\forall X0.(l1_abc Miz_0 X0) \Rightarrow (\forall X1.(l1_abc Miz_0 X1) \Rightarrow ((u1_abc Miz_0 X0 = u1_abc Miz_0 X1) \wedge (v4_abc Miz_0 X0)) \Rightarrow (v4_abc Miz_0 X1))$$
