t32_enumset1 (TMb7TCGTgqXJfoF5xhBAWvxcdnanVLj7FcV)

October 27, 2020

Let $k3\_enumset1 : \iota \Rightarrow \iota \Rightarrow \iota \Rightarrow \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k2\_enumset1 : \iota \Rightarrow \iota \Rightarrow \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k2\_xboole\_0 : \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k1\_enumset1 : \iota \Rightarrow \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k1\_tarski : \iota \Rightarrow \iota$ be given. Assume the following.

$$\forall X0.\forall X1.\forall X2.\forall X3.k2\_enumset1\ X0\ X1\ X2\ X3 = k2\_xboole\_0\ (k1\_enumset1\ X0\ X1\ X2)\ (k1\_tarski\ X3) \tag{1}$$

Assume the following.

$$\forall X0.\forall X1.\forall X2.k2\_enumset1\ X0\ X0\ X1\ X2 = k1\_enumset1\ X0\ X1\ X2 \tag{2}$$

Assume the following.

$$\forall X0.\forall X1.\forall X2.\forall X3.\forall X4.k3\_enumset1\ X0\ X1\ X2\ X3\ X4 = k2\_xboole\_0\ (k2\_enumset1\ X0\ X1\ X2\ X3)\ (k1\_tarski\ X4) \tag{3}$$

Theorem 1

$$\forall X0.\forall X1.\forall X2.\forall X3.k3\_enumset1\ X0\ X0\ X1\ X2\ X3 = k2\_enumset1\ X0\ X1\ X2\ X3$$
