October 27, 2020

Let $l1_compos_1 : \iota \Rightarrow o$ be given. Let $k6_numbers : \iota$ be given. Let $k2_afinsq_1 : \iota \Rightarrow \iota$ be given. Let $k4_compos_1 : \iota \Rightarrow \iota$ be given. Let $k6_domain_1 : \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k5_numbers : \iota$ be given. Assume the following.

$$\forall X0.(l1_compos_1 X0) \Rightarrow ((k2_afinsq_1 (k4_compos_1 X0) = k6_domain_1 k5_numbers k6_numbers) \wedge (k6_numbers \in k2_afinsq_1 (k4_compos_1 X0))) \quad (1)$$

Theorem 1

$$\forall X0.(l1_compos_1 X0) \Rightarrow (k6_numbers \in k2_afinsq_1 (k4_compos_1 X0))$$
