Let $k6_kurato_1 : \iota$ be given. Let $k1_tops_1 : \iota \Rightarrow \iota \Rightarrow \iota$ be given. Let $k3_topmetr : \iota$ be given. Let $k2_pre_topc : \iota \Rightarrow \iota \Rightarrow \iota$ be given. Assume the following.

$$\begin{aligned} & k1_tops_1 \ k3_topmetr \ (k2_pre_topc \ k3_topmetr \ k6_kurato_1) \neq k1_tops_1 \\ & k3_topmetr \ (k2_pre_topc \ k3_topmetr \ (k1_tops_1 \ k3_topmetr \ k6_kurato_1)) \end{aligned} \tag{1}$$

Theorem 1 $k6_kurato_1 \neq k1_tops_1 \ k3_topmetr \ k6_kurato_1$.
